PROFILE

An Italian FX artist with full-production experience at Chromatica, Rome. Working in a compact team of FX artists has built a broad skill set across nearly every aspect of Houdini, with the ability to own a shot from concept to final comp delivery. Deeply passionate about the work, with a drive to challenge every result — not just to meet the bar, but to push past it and deliver something worth looking back on.

Great FX don't carry a film — but they can lift a great one to another level, and quietly rescue a struggling one.
